

Monona Capital

Client Processes

(Sign Up, Withdrawing Cash, Your Earnings, and Tax Information)

Monona Capital (<https://www.mononacapital.com/>) is a service that allows you to invest your savings with genuine growth. All investment firms invest your money in extremely low risk trades. Your investment can do much more with our different strategy of high volume trading and risk limiting order types.

The complete sign up process of Monona Capital follows:

Sign Up

1. Send Interest Form: Go to <https://www.mononacapital.com/signup> to submit your form of interest. It is not official and just to confirm you have interest. Make sure you enter an email that you will check often.

2. Get Official Form: Your application can be rejected or accepted. If it is rejected, you may receive an email or nothing at all. If your application was accepted, within 1-3 business days you will receive an email containing a link to the official form. You will have 4 days to complete this form before you are automatically denied.

3. Complete Official Form: Once you have completed the official form with honesty and submit it, your Monona Capital Account will automatically be created (<https://www.mononacapital.com/login/>). At this stage, your official application can still be denied but is most likely to be approved if you answered the form without issues.

4. Deposit Money: At the time you submit the official form, bank account details will be shown. They will also be on the website when you login. From when you submitted the official form you will have exactly 5 business days to deposit your investment. If you do not, your account will be banned.

(If you deposit your investment after the deadline, it will be refunded.)

5. Your Account: If you have done all the previous steps correctly, your account will contain the live metrics of your investment. This activation will usually happen within 2 business days after receiving your deposit.

Maximum Sign Up Time: 14 Business Days

Minimum Sign Up Time: 2 Business Days

Most Likely Sign Up Time: 5 Business Days

To Withdraw money or all your assets completely, this is the process to follow.

Withdraw

1. Send Withdraw Request: Go to <https://www.mononacapital.com/login/> to login to your account. Then navigate to the Message Center. Once there you will be able to fill out a withdrawal request. Make sure to include bank information. Once sent, it may take **1-3 business days** for your money to show up in your bank account.

Taxes are for Monona Capital income:

Tax Guide

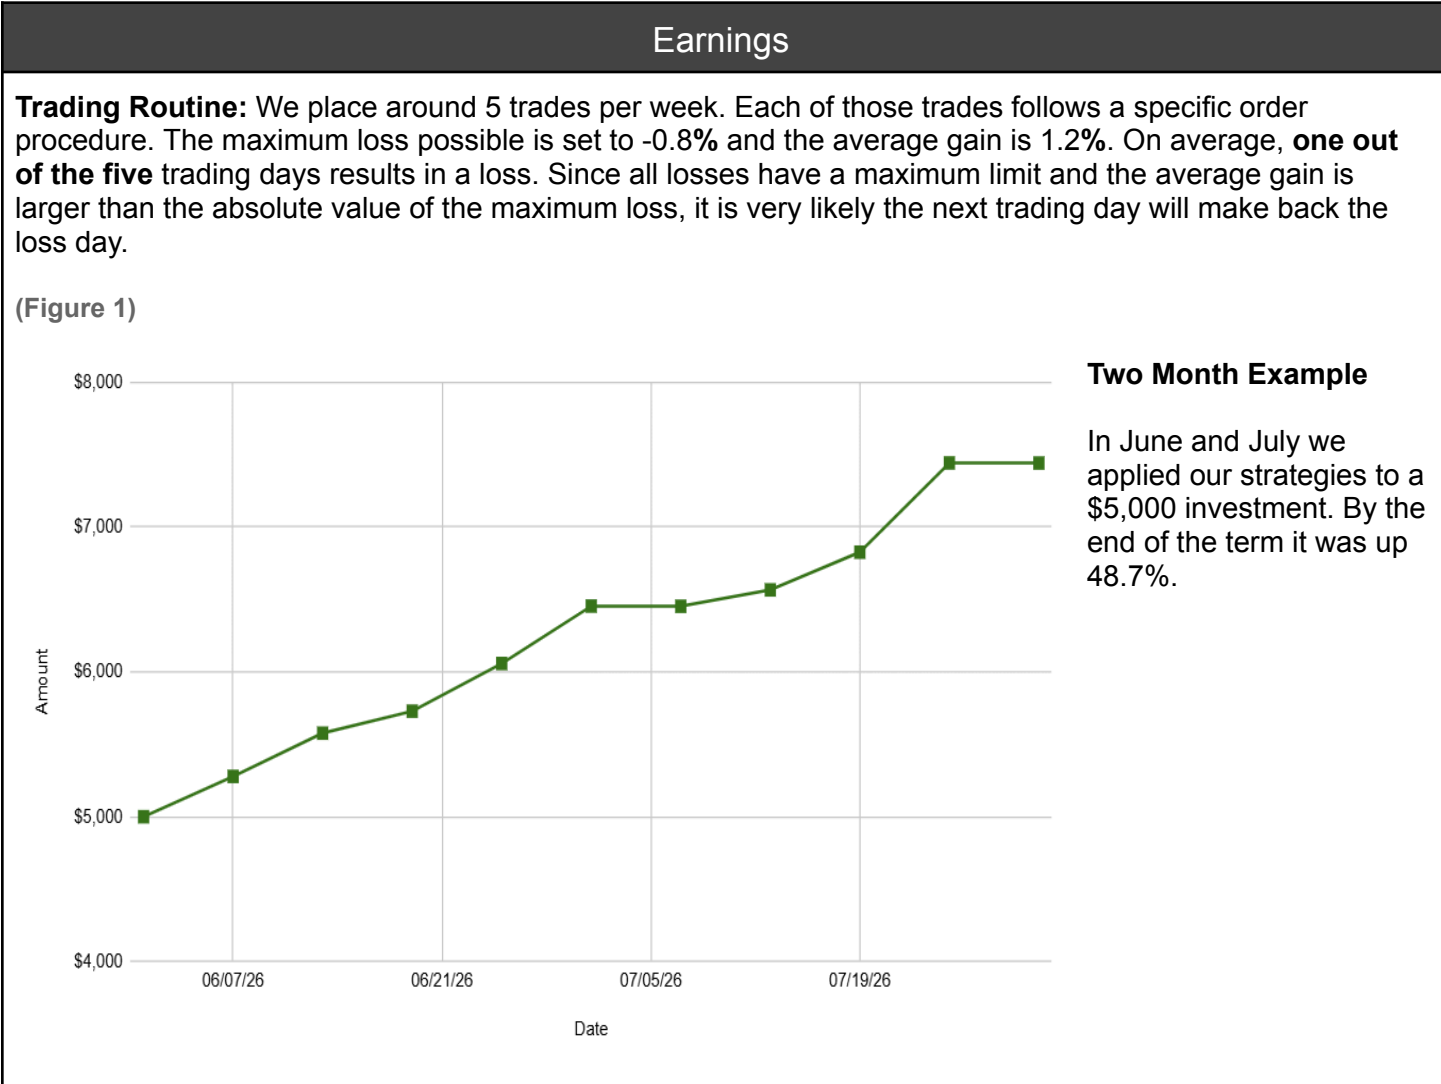

Monthly Taxes: Monona Capital automatically takes a monthly tax of **0.5% of investment earnings** on the first of each month.

Sign Up Taxes: Monona Capital **DOES NOT** charge you anything for creating an account and depositing money.

Withdraw Taxes: Monona Capital automatically takes 5% of the cash that you would like to take out.

(!: Federal and State Income Tax still applies to your earnings after withdrawal.)

Because of our much more efficient trading strategies, your return on investment will be much higher than the national average (<https://www.mononacapital.com/> for simulation). This how we manage your money:
